

US v. Keith Raniere (EDNY)

PROVEN GOVERNMENT EVIDENCE FABRICATION

"[K]ey evidence ... was extensively **falsified**" and "**the involvement of government personnel in this evidentiary fraud is inescapable** – an unprecedented finding in our 150+ years of forensic experience."

– Seven forensic examiners, including four former FBI CART examiners; independently verified by an expert retained by Newsweek

"In our collective experience, **we have never seen a case with this degree of widespread government malfeasance** as *United States v. Keith Raniere*."

– Three former U.S. Attorneys, multiple ex-FBI agents and other prominent legal experts

FBI Director Chris Wray

The FBI cover-up of the fabrication occurred under Wray. A decorated retired agent who knew him personally sounded the alarm – Wray ignored it.

SCO Jack Smith

In the prosecution of Trump, Smith brought in the same FBI expert used solely to cover up the evidentiary fraud in *U.S. v. Raniere* – the expert's only other case in four years. Why him?

AG Merrick Garland

After post-conviction motions exposed evidence fabrication and planting, Garland *awarded* the implicated agents and prosecutors *for their work in this very case*, and the cover-up was under his tenure.
